

Press Release

Glide Free Foiling Courses on Lake Garda

In a world first, Sail Laser is now offering RYA accredited sailing courses on Lake Garda in Italy using Glide Free Foils! <http://www.sail-laser.it/en/category-courses/2/>

Glide Free Design has recently conducted coaching of sailors at Lake Garda in Italy. Shaun Priestly, an RYA accredited trainer, has trialled the foils in a range of breezes and has been putting the boat through its paces.

Shaun Priestly foiling at Lake Garda in Italy

SailLaser centre principal at Lake Garda, Shaun Priestley is conducting the foiling training using Glide Free Foils. You are able to come to Lake Garda and try foiling on a Laser dinghy. The training course is being developed around foiling skills levels 1,2 & 3, providing you with the opportunity to try, train or buy foils for your Laser.

TORBOLE FOILING COURSES

Laser Foiling is unique and unforgettable experience! We are offering two course, firstly the Level 1 looking at rigging and take off then moving onto the Level 2 covering keeping the boat.

GLIDE FREE FOILING LEVEL 1

- 🕒 Duration: 2 days
- 👤 Min. age: 12
- 💰 Price: 200 €
- 🏠 Price for residents: 250 €

Foiling level 1 covers how to set up the foils, basics of how the foils work and how to take off. By the end of the 2 days we would like level 1 candidates to go away of understanding of the foils and have experience of flying for the first time.

GLIDE FREE FOILING LEVEL 2

- 🕒 Duration: 2 days
- 👤 Min. age: 12
- 💰 Price: 200 €
- 🏠 Price for residents: 250 €

Foiling level 2 you will learn how to set the foils for different conditons, what rig to use and how to keep the boat level.

GLIDE FREE FOILS

Foiling dinghies provide a thrill unlike other forms of sailing. Incredibly, Glide Free Foils supercharge your Laser which can be upgrading with our retrofit foiling kit.

First time foiling

Italian 470 sailor Francesco Falcetelli tried foiling at Lake Garda and writes...

“It was the first time I sailed with a foils boat and was so strange that the boat was a common Laser. When I saw you sailing so easy I thought that I could sail in few minutes like you. But I was wrong!

When I jumped into the Laser I tried hiking hard to pull in the main and find pressure but nothing happened. I understood later that I had to move to the back and keep the boat very flat in order to let the foils work in the best way. Suddenly the Laser came up, but it was like a crazy horse! I was unable to keep the boat flat, every time was too much on the leeward side but finally I made it!

Francesco foiling a Laser for the first time with Glide Free Foils

I released the main in time with the boat just a little bit on the windward side, the Laser started to fly! Then the apparent wind turned very quickly towards the bow, like in the half time it happens on the 470 I usually sail, I beared away and there was no sound of the water, only me and the wind. Thank you Peter, everyone should have this boat to feel this wonderful feeling!”

Model Yachtsman

Model yachtsman Brad Gibson also took a Laser fitted with Glide Free Foils for his first ever Laser foiling experience.
